| E-week 06 (08-14Feb15) | E-week 07 (15-21Feb15) | E-week 08 (22-28Feb15) | E-week 09 (01-07Mar15) | E-week 10 (08-14Mar15) | E-week 11 (15-21Mar15) | E-week 12 (22-27Mar15) at 3.30pm |
|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|-------------------------------------|
| 172 | 100 | 172 | 190 | 110 | 91 | 104 |

Cumulative No. of cases for 2015 (First 11 week): 2028

Compiled by Communicable Diseases Division, Ministry of Health

92 dengue cases were reported in the week ending 21 Mar, **18** cases less than the previous week. While there has been a decrease in the number of dengue cases, we need to remain vigilant and continue to work as a community to keep dengue cases in check as a large proportion of our population is still susceptible to dengue infection due to the lack of immunity.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Residents with plants in vases should change the water and scrub the inside of the vases every alternate day to prevent mosquito breeding. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
