Number of Dengue cases

It is important to note that day-to-day numbers fluctuates as they depend on the number of notification received. Therefore, weekly numbers are a better reflection of actual trends.

No. of Reported Cases*

13-Jun	14-Jun	15-Jun	16-Jun	17-Jun	18-Jun	19-Jun at 3.30pm
16	17	38	29	36	25	10

*provisional

No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 18 (03-09May15)	E-week 19 (10-16May15)	E-week 20 (17-23May15)	E-week 21 (24-30May15)	E-week 22 (31May-06Jun15)	E-week 23 (07-13Jun15)	E-week 24 (14-19Jun15 at 3.30pm)
135	158	109	180	152	194	155

Cumulative No. of cases for 2015 (First 23 week): 3655

Compiled by Communicable Diseases Division, Ministry of Health

194 dengue cases were reported in the week ending 13 June, **42** cases more than in the previous week. NEA urges all members of the public and stakeholders to stay vigilant as we are seeing an increase in the *Aedes* mosquito population and increase in transmission of the virus serotype DENV-2. All stakeholders need to sustain prevention efforts as we enter the traditional dengue peak season. The warmer months of June to October are when there is usually higher transmission of dengue in Singapore due to accelerated breeding and maturation cycles for the *Aedes* mosquitoes and shorter incubation periods for the dengue virus.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Residents with plants in vases should change the water and scrub the inside of the vases every alternate day to prevent mosquito breeding. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. Those planning to go overseas for vacation during the current school holidays should also mosquito-proof their homes before they travel.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
