

## Dengue Cases

*It is important to note that the day-to-day numbers fluctuate, as they depend on the number of cases notified each day. Therefore, weekly numbers are a better reflection of actual trends.*

### Number of Reported Cases

29-Apr	30-Apr	1-May	2-May	3-May	4-May	5-May at 3pm
8	3	4	6	7	8	8

### Number of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 12 (19Mar-25Mar17)	E-week 13 (26Mar-01Apr17)	E-week 14 (02Apr-08Apr17)	E-week 15 (09Apr-15Apr17)	E-week 16 (16Apr-22Apr17)	E-week 17 (23Apr-29Apr17)	E-week 18 (30Apr-05May17 at 3pm)
32	50	37	32	51	38	36

Cumulative No. of cases for 2017 (First 17 E-weeks): 892
--

**Compiled by Communicable Diseases Division, Ministry of Health**

38 dengue cases were reported in the week ending 29 Apr 2017, 13 cases fewer than the previous week. While the current number of dengue cases is relatively low, all stakeholders need to sustain prevention efforts as we enter the traditional dengue peak season. The warmer months of June to October are when there is usually higher transmission of dengue in Singapore due to accelerated breeding and maturation cycles for the *Aedes* mosquitoes and shorter incubation periods for the dengue virus. NEA therefore urges all members of the public and stakeholders to continue to work together as a community to stem dengue transmission.

Source eradication of mosquito breeding habitats and spraying of insecticides to control the adult mosquito population remain key to dengue prevention. NEA, together with the various agencies and other stakeholders represented on the Inter-Agency Dengue Task Force (IADTF), including Town Councils, have been checking and ridding our public areas and housing estates of potential mosquito breeding habitats. NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All stakeholders need to remove stagnant water from our environment, so as to deprive the mosquitoes of their breeding habitats.

Those infected with dengue should also apply repellent to prevent mosquitoes from biting and picking up the virus from them, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. Please visit the NEA website for more information on dengue. The latest updates can also be found on the Stop Dengue Now Facebook page or myENV app.
