No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)						
E-week 40 (02-08Oct16)	E-week 41 (09-15Oct16)	E-week 42 (16-22Oct16)	E-week 43 (23-29Oct16)	E-week 44 (30Oct-05Nov16)	E-week 45 (06-12Nov16)	E-week 46 (13-18Nov at 3pm)
124	94	107	82	85	84	60
Cumulative No. of cases for 2016 (First 45 weeks): 12607						
Compiled by Communicable Diseases Division, Ministry of Health						

84 dengue cases were reported in the week ending 12 Nov 2016, 1 case fewer than the previous week. We need to keep up the momentum and continue to work as a community to suppress the Aedes mosquito population and keep dengue cases in check. As the same mosquito vector which transmits dengue also transmits Zika, yellow fever and chikungunya, the preventive measures implemented will also help to prevent Zika and other vector borne diseases from taking root in Singapore.

Source eradication of mosquito breeding habitats and spraying of insecticides to control the adult mosquito population remain key to dengue prevention. NEA, together with the various agencies and other stakeholders represented on the Inter-Agency Dengue Task Force (IADTF), including Town Councils, have been checking and ridding our public areas and housing estates of potential mosquito breeding habitats.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mizzie Wipeout. Those planning to go on vacation should mosquito-proof their homes before they travel. Those infected with dengue should also apply repellent to prevent mosquitoes from biting and picking up the virus from them, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, [www.dengue.gov.sg](http://www.dengue.gov.sg) or the myENV app.
