Number of Dengue cases

It is important to note that day-to-day numbers fluctuates as they depend on the number of notification received. Therefore, weekly numbers are a better reflection of actual trends.

No. of Reported Cases*

27-Jun	28-Jun	29-Jun	30-Jun	1-Jul	2-Jul	3-Jul at 3.30pm
18	9	37	40	49	36	18

*provisional

No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 20 (17-23May15)	E-week 21 (24-30May15)	E-week 22 (31May-06Jun15)	E-week 23 (07-13Jun15)	E-week 24 (14-20Jun15)	E-week 25 (21-27Jun15)	E-week 26 (28Jun-03Jul15 at 3.30pm)
109	180	152	193	208	241	189

Cumulative No. of cases for 2015 (First 25 week): 4103

Compiled by Communicable Diseases Division, Ministry of Health

242 dengue cases were reported in the week ending 27 June, **34** cases more than in the previous week. The warmer months of June to October are when there is usually higher transmission of dengue in Singapore due to accelerated breeding and maturation cycles for the *Aedes* mosquitoes and shorter incubation periods for the dengue virus. The increase in cases is a timely reminder that we need to continue to work as a community to keep dengue cases in check as a large proportion of our population is still susceptible to dengue infection due to the lack of immunity. All stakeholders need to sustain efforts as we enter the traditional dengue peak season.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Residents with plants in vases should change the water and scrub the inside of the vases every alternate day to prevent mosquito breeding. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
