## Latest Dengue Data

Number of Dengue cases						
<i>It is important to note that day-to-day numbers fluctuates as they depend on the number of notification received. Therefore, weekly numbers are a better reflection of actual trends.</i>						
No. of Reported Cases*						
24-Sep	25-Sep	26-Sep	27-Sep	28-Sep	29-Sep	30-Sep at 3pm
26	12	23	18	32	15	4
*provisional						
No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)						
E-week 33 (14-20Aug16)	E-week 34 (21-27Aug16)	E-week 35 (28Aug-03Sep16)	E-week 36 (04-10Sep16)	E-week 37 (11-17Sep16)	E-week 38 (18-24Sep16)	E-week 39 (25-30Sep16 at 3pm)
221	271	308	241	174	174	104
Cumulative No. of cases for 2016 (First 38 weeks): 11897						
Compiled by Communicable Diseases Division, Ministry of Health						

**174** dengue cases were reported in the week ending 24 Sep 2016, **the same number as** the previous week. We need to remain vigilant and continue to work as a community to suppress the Aedes mosquito population and keep dengue cases in check. As the same mosquito vector which transmits dengue also transmits Zika, yellow fever and chikungunya, the preventive measures implemented will also help to prevent Zika and other vector borne diseases from taking root in Singapore.

Source eradication of mosquito breeding habitats and spraying of insecticides to control the adult mosquito population remain key to dengue prevention, and we need to keep up with these efforts as we strive towards mitigating the forecast surge in cases. NEA, together with the various agencies and other stakeholders represented on the Inter-Agency Dengue Task Force (IADTF), including Town Councils, have been checking and ridding our public areas and housing estates of potential mosquito breeding habitats.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. Those planning to go on vacation should mosquito-proof their homes before they travel. Those infected with dengue should also apply repellent to prevent mosquitoes from biting and picking up the virus from them, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, [www.dengue.gov.sg](http://www.dengue.gov.sg) or the myENV app.
