Latest Dengue Data

Number of Dengue cases

It is important to note that day-to-day numbers fluctuates as they depend on the number of notification received. Therefore, weekly numbers are a better reflection of actual trends.

No. of Reported Cases*

6-Sep	7-Sep	8-Sep	9-Sep	10-Sep	11-Sep	12Sep at 3.30pm
41	32	70	45	64	58	32

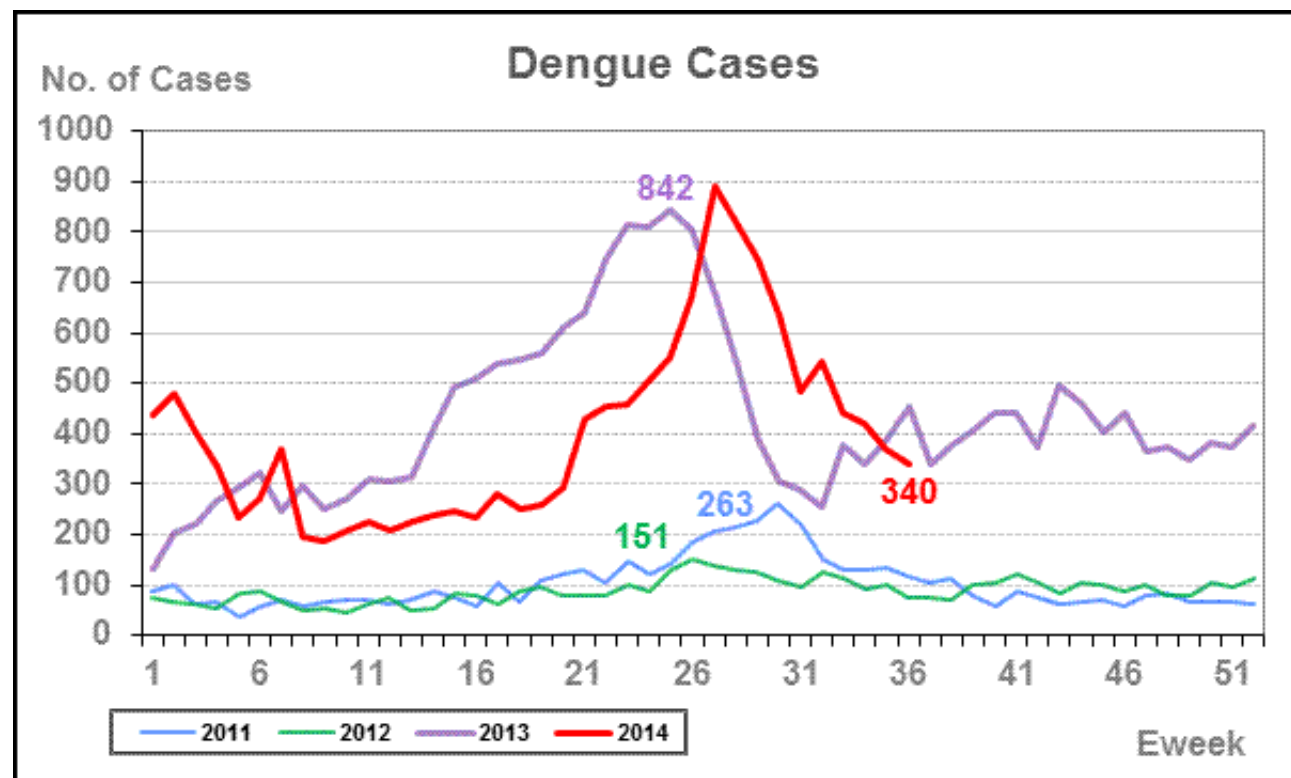

*provisional

No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 31 (27Jul-02Aug14)	E-week 32 (03-09Aug14)	E-week 33 (10-16Aug14)	E-week 34 (17-23Aug14)	E-week 35 (24-30Aug14)	E-week 36 (31Aug-06Sep14)	E-week 37 (07-12Sep14) at 3.30pm
484	545	442	418	370	340	301

Cumulative No. of cases for 2014 (First 36 weeks): 14350

Compiled by Communicable Diseases Division, Ministry of Health

340 dengue cases were reported in the week ending 6 Sep, 30 cases fewer than in the previous week. Despite the dip in cases, we remain in the peak dengue season. We need to keep up our efforts to prevent dengue cases from rebounding.

To protect ourselves, all of us need to play our part in removing stagnant water from our environment, so as to deprive the mosquitoes of their breeding habitats. Inverting pails and plant pot plates, changing water in vases regularly, and capping bamboo pole holders when they are not in use are simple steps that everyone can take to prevent mosquitoes from establishing a foothold in our neighbourhoods. Those infected with dengue should protect themselves from mosquito bites by applying repellent regularly, and those showing symptoms suggestive of dengue should see their GPs early to be diagnosed.

NEA encourages everyone to be an advocate and remind his family members and neighbours to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
