E-week 43 (19-25Oct14)	E-week 44 26Oct-1Nov14	E-week 45 (02-08Nov14)	E-week 46 (09-15Nov14)	E-week 47 (16-22Nov14)	E-week 48 (23-29Nov14)	E-week 49 30Nov-05Dec14) at 3.30pm
213	186	169	159	149	164	175

Cumulative No. of cases for 2014 (First 48 weeks): 17404

Compiled by Communicable Diseases Division, Ministry of Health

**164** dengue cases were reported in the week ending 29 Nov, 15 cases more than in the previous week. After a number of weeks with lower number of cases, the slight increase in cases last week over the week before is a timely reminder that we need to stay vigilant, as a large proportion of our population is still susceptible to dengue infection due to the lack of immunity.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. Those planning to go overseas for vacation during the current school holidays should also mosquito-proof their homes before they travel.

NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, [www.dengue.gov.sg](http://www.dengue.gov.sg) or the myENV app.
