Latest Dengue Data

Number of Dengue cases

It is important to note that day-to-day numbers fluctuates as they depend on the number of notification received. Therefore, weekly numbers are a better reflection of actual trends.

No. of Reported Cases*

1-Nov	2-Nov	3-Nov	4-Nov	5-Nov	6-Nov	7-Nov at 3.30pm
17	11	35	30	34	26	4

*provisional

No. of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 39 (21-27Sep14)	E-week 40 (28Sep-04Oct14)	E-week 41 (05-11Oct14)	E-week 42 (12-18Oct14)	E-week 43 (19-25Oct14)	E-week 44 (26Oct-1Nov14)	E-week 45 (02-07Nov14) at 3.30pm
346	339	280	297	213	186	140

Cumulative No. of cases for 2014 (First 44 weeks): 16763

Compiled by Communicable Diseases Division, Ministry of Health

186 dengue cases were reported in the week ending 1 Nov, **27** cases fewer than in the previous week. Despite the dip in cases, we should remain vigilant and not let our guard down. NEA advises all stakeholders to keep up efforts to prevent dengue cases from picking up again.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must continue to play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed.

NEA encourages everyone to be an advocate and remind his family members and neighbours to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
