Cumulative No. of cases for 2014 (First 43 weeks): 16579

Compiled by Communicable Diseases Division, Ministry of Health

215 dengue cases were reported in the week ending 25 Oct, **82** cases fewer than in the previous week. The risk of dengue transmission remains high and NEA advises all stakeholders to stay vigilant. We need to keep up our efforts to prevent dengue cases from picking up again.

Source eradication of mosquito breeding habitats remains key to preventing mosquito breeding. All stakeholders must continue to play their part to help stem dengue transmission in the environment, by checking their premises daily for potential mosquito breeding habitats and removing them. Those infected with dengue should protect themselves from mosquito bites by applying repellent as regularly as possible, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed.

NEA encourages everyone to be an advocate and remind his family members and neighbours to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. The latest updates on the dengue situation can be found at the Stop Dengue Now Facebook page, www.dengue.gov.sg or the myENV app.
