7/2/2017 Dengue Cases

Dengue Cases

It is important to note that the day-to-day numbers fluctuate, as they depend on the number of cases notified each day. Therefore, weekly numbers are a better reflection of actual trends.

Number of Reported Cases

23-Jun	24-Jun	25-Jun	26-Jun	27-Jun	28-Jun	29-Jun at 3pm
10	7	6	10	18	10	4

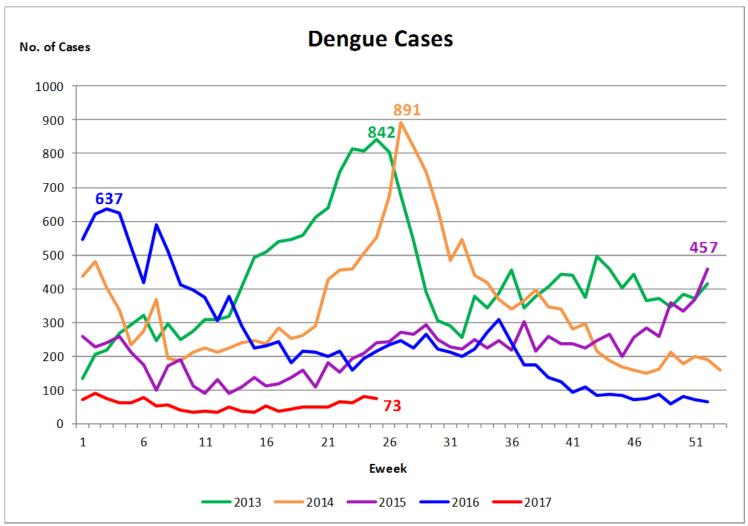

Number of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 20	E-week 21	E-week 22	E-week 23	E-week 24	E-week 25	E-week 26
(14-	(21-	(28May-	(04-	(11-	(18-	(25-29Jun17 at
20May17)	27May17)	03Jun17)	10Jun17)	17Jun17)	24Jun17)	3pm)
50	50	66	62	80	73	48

Cumulative No. of cases for 2017 (First 25 weeks): 1363

Compiled by Communicable Diseases Division, Ministry of Health

7/2/2017 Dengue Cases

73 dengue cases were reported in the week ending 24 June 2017, 7 cases fewer than in the previous week. All stakeholders need to sustain prevention efforts as we are in the traditional dengue peak season. The warmer months of June to October are when there is usually higher transmission of dengue in Singapore due to accelerated breeding and maturation cycles for the Aedes mosquitoes and shorter incubation periods for the dengue virus. NEA therefore urges all members of the public and stakeholders to continue to work together as a community to stem dengue transmission.

Source eradication of mosquito breeding habitats and spraying of insecticides to control the adult mosquito population remain key to dengue prevention. NEA, together with the various agencies and other stakeholders represented on the Inter-Agency Dengue Task Force (IADTF), including Town Councils, have been checking and ridding our public areas and housing estates of potential mosquito breeding habitats. NEA encourages everyone to join in the collective effort to help stop the dengue transmission cycle by doing the 5-step Mozzie Wipeout. All stakeholders need to remove stagnant water from our environment, so as to deprive the mosquitoes of their breeding habitats.

Those infected with dengue should also apply repellent to prevent mosquitoes from biting and picking up the virus from them, and those showing symptoms suggestive of dengue, should see their GPs early to be diagnosed. All of us, including residents, contractors, and business owners, have a part to play in preventing dengue. Please visit the NEA website for more information on dengue. The latest updates can also be found on the Stop Dengue Now Facebook page or myENV app.
